

MINIATURE SCENERY

INSTRUCTIONS HMS SIREN CAPTAINS CABIN UPGRADE KIT

Preparation

You will need:

- Cutting mat or something to protect your table.
- PVA/Wood glue or superglue if you prefer.
- Small file or sand paper.
- Small blade / hobby knife

General Process

- Clear plenty of table space, you will need it.
- Parts should remove easily from the board by pressing through and popping them out. It's a good idea to cut through the tiny joins first though, and some parts (particularly smaller, more detailed parts) may need more careful persuasion.
- Use file or sand paper to remove the small bur caused by the connection to the frame.
- It's a good idea to familiarise yourself with how the pieces fit together before gluing.
- Slot the parts together as shown by the pictures below, applying glue wherever there is a connection. (unless shown otherwise)
- Parts may be a very tight fit, slight trimming or sanding of parts may be needed for ease of assembly.

Painting Notes:

Ships Cabins (and indeed entire ships) of the era were painted and finished according to the captain's wishes. This would normally consist of combinations of Natural, varnished wood and White lead paint.

The Cabin floor of British Naval vessels was covered in a fitted canvas, black and white chequer pattern material or (in the case of a more wealthy ship) tiled or painted.

On a smaller ship such as the Siren, The folding, hard sided hammock bedding for the captain and first officer were stored away when not in use.
